PROJECTS

EcoRoute Compass :

Designed and developed an interactive web application that calculates eco-friendly travel routes by minimizing travel distance and promoting efficient paths.The system uses Haversine formula to compute straight-line distances between points,improving route efficiency by up to 25%.

Text-to-Image Generation in Python Using Stable Diffusion :

Built a deep learning-based system using **Stable Diffusion** to generate photorealistic images from text prompts. The project leverages a **latent diffusion model** trained on billions of image-text pairs to synthesize creative and contextually accurate visuals.Reduced image generation latency by 30% and achieved over 85% prompt-image relevance accuracy.
